Model: SRT17 5000mm OFF 10mm

Step 1. Turn Main Power Supply Off

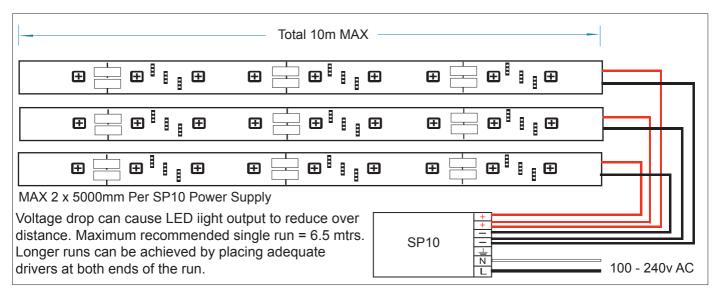

Step 2. Make required cuts ONLY at cut points (every 50mm)

For connections of SRT17:

Ensure connections are appropriately sealed with a sealant suitable for the location, in order to maintain waterproof properties of the LED strip.

Step 3. Test SRT17 with power supply BEFORE final installation.

Step 4. Wire to power supply.

Alternates:SP05 will run 1m; SP07 will run 3.2m; SP09 will run 6.5m

Step 5. Once tested as working, turn off Main Power Supply.

Step 6. Use mounting clips to attach to your chosen surface (2 per Mtr).

Step 7. Turn Main Power Supply On
